

IFC TechEmerge Sustainable Cooling Innovation

The **TechEmerge Sustainable Cooling Innovation Program** matches companies worldwide with cost-effective, energy-efficient, climate-smart cooling solutions with leading corporates in emerging markets to conduct pilot projects and build commercial partnerships.

In partnership with UK Government's Department of Energy Security & Net Zero, this award-winning program from the **International Finance Corporation (IFC)**, a member of the World Bank, offers selected pilot partners funding to field test sustainable cooling technologies on the ground in key sectors, as well as support to grow their business.

Benefits for adopters

Tailored expert assessment

TechEmerge leverages IFC's deep industry and emerging market expertise to pinpoint adopters' unique needs and innovation opportunities.

Awareness of innovative solutions

Adopters can access new and emerging solutions from innovators across the world.

De-risking innovation

Adopter companies can field test cutting-edge innovations before committing to buy, lowering costs and de-risking innovation projects.

Financial and technical support

Access to grant funding and guidance from TechEmerge and its network of industry advisors supports pilot implementation.

Investment potential

IFC will help assess financing needs and may invest in scalable solutions.
